Share your cancer story. It can save lives.

My name is Ruth. When I turned 45, my doctor recommended that I complete an easy at-home colorectal cancer screening test called a FIT. It came back abnormal. My doctor said I had to get a follow-up colonoscopy and the results showed that I had stage 1 colorectal cancer.

I was so surprised because I had no symptoms, felt totally fine, and don't have a family history of cancer. I was scared too, but found comfort and strength in my faith knowing that God is with me. I'm so grateful that I got screened on time. My cancer was found early and could be easily treated!

Don't delay - get screened today!
